The northern part of this Township seems to be the summit or table lands between the waters of Eel river & Tippecanoe. What land is dry, is mostly rolling & good, but the swamps are innumerable and interminable.

I hereby certify, that in pursuance of a contract with Micajah T. Williams, Surveyor General of the United States for the States of Ohio and Indiana and the Territory of Michigan, bearing date the 27th day of December 1833, and in good conformity to the laws of the United States, and the instructions of the said Surveyor General, I have surveyed and subdivided into sections, Township No 31 north in range No 7 East, in the State of Indiana, and I do further certify that the foregoing are the true, and worthy, the original field notes of the said Survey & subdivisions executed as aforesaid.
Certified this day of April 1834

The largest portion of the land in this township is of a thin quality of soil, rather broken and 3rd rate. The principal timber is W. oak. Hackberry bushes were found in some places in the barrens. There is a great deal of surplus water in this township.

Turkey Lake has been raised about five feet above its level, by reason of a mill dam which had been erected at the outlet on Turkey Creek; in consequence of which a large body of marshy prairie and some finely

T 34 N. R 7 E. 2nd Mer. (Ind^{us})

timbered land belonging to Government has been inundated.

At the period when it was measured, owing to the long continued drouth in the fall and summer & winter preceeding, the lake had subsided to something like three feet below its level in ordinary seasons since the erection of the dam.

fall of
1838

The timber on the land overflowed is totally destroyed.

Several hundred acres, it is believed, has been rendered valueless in consequence of the erection of the mill dam.

This might be partially reclaimed by its removal. The soil is from one to three inches deep on the broken barrens. On the rich timbered land it is from four to six inches.

Turkey lake, and the marshes with which it is partially environed, being locked up with ice and covered with snow, rendered it impossible to observe the mouths of all the creeks and inlets emptying into it; which accounts for their not being all noted.

I do hereby certify that in pursuance of a contract made with Robert Lytle Surveyor General of the United States for the States of Ohio, Indiana and Michigan, bearing date the 10th day of May 1838 and in strict conformity with the laws of the United States, and the instructions of the said Surveyor General, I have surveyed and subdivided into sections & fractional sections, fractional Town 34 N. in range No. 7 East. in the State of Indiana & measured Turkey lake & several others within said Township; And I do further certify the foregoing to be the true and original field notes of said survey and subdivision executed as aforesaid.

Certified this 27th day of January 1839

The East half of this
Township is very fine Land - The West
half inclines more to oak timber -
which mostly grows on low Land. The
N. W. part likewise gives the head of
some watercourses which invariably have
their source from Swamps. This Township
I have to subdivide a higher variation
than is given for the East Boundary (various

This Township, compared with the country generally, may be considered one of fine land. It is less interrupted with swamps & marshy prairie, Bears a heavy luxuriant growth of timber well suited to its future improvement.

I hereby certify that in pursuance of a contract with M. J. Williams, Surveyor Genl. of the United States, for the States of Ohio & Indiana & the Territory of Michigan bearing date the 27th day of Decr. 1833 - and in good conformity to the Laws of the United States and the instructions of said Surveyor General - I have Surveyed and subdivided into sections Township 31 N, R. 6 E, 2nd Mer, in the State of Indiana. And I do further certify that the foregoing are the true, and mainly the original field notes of said Survey & subdivision executed as aforesaid.

Certified this 24th day of June
1834.

General Description This Township contains every variety of Soil. It has consid- erable Barrens - some of which are beautiful, but generally rather thin Soil. - There is one or more of the most extensive Tamarack Swamps I have ever seen - mostly in Secs 16, 17, 21, 21. & 28			

T30 N. R 5 E, 2nd Mer. Indiana.

I hereby certify that in pursuance of a contract with M. J. Williams, Surveyor Genl. of the United States for the States of Ohio, Indiana & the Territory of Michigan bearing date the 27th day of December 1833 - And in good conformity to the laws of the United States, and the instructions of said Surveyor Genl. I have surveyed and subdivided into Sections Township No 30 North Range No 5 East 2nd Mer. in the State of Indiana - And I do further certify that the foregoing are the true and mainly the Original field Notes of said Survey and subdivision, executed as aforesaid -

Certified this 8th day of

Note by Surveyor Run this line at Random. Var. 5° 18' and at end of E. 34 E. Intersected Town Line 12.50 E. of Cor. of Towns 34 & 35 Ranges 5 & 6 E. - I have been often vexed & surprised at my clothes on this old work - but thought this time there must be a mistake in my work, so run this line & measured it over - measured the whole of the E. Boundary of T. 34 N. R 6 E. and found them both entirely correct.

Before I began this tier of towns I took the bearing of the E. Boundary of T. 35 R 6. by running accurately the W. E. Boundary of Sec. 32. - I could see one post from the other, with two station trees in Range - and found the Var 3° 58' - although I saw at the same time found the E. Boundary of Sec. 31. did not bear the same by some 40' - yet I thought that by running at 6° would straighten the work. But I have been again deceived, and after spending seven days about T 34 R 6. - have left it thus

Genl. Description

Township No. 31. N. of Range No. 4 E. of 2nd Mer. is one of good Land - about a $\frac{1}{4}$ of it is 1st rate $\frac{1}{2}$ with 2nd Rate - and the other $\frac{1}{4}$ 3rd rate -

It is heavily timbered - Soil deep black Loam, slightly sandy, bedded upon gravel & Sand - It is well watered with Springs, The Drains, Brooks & Branches are not, it is presumed lasting, as they take their rise from the wet Prairies, Marshes and Alder Swamps, which though small, are found on the dividing ridges of this Township.

The small Lake in Sec. 32 is most beautifully situated, and surrounded by Land of the first quality.

The Outlet from it is scarcely sufficient for purposes of Machinery.

The only mill stream is the Creek in the N.E. & N. part.

The "Trails" marked on the Map, it is believed, lead from "Reserves" on Eel River to a Large Reserve on Tippecanoe River, and from thence to the Indian Mill, on Lake Manitowish. The (windfall) in this Township has been made at least 30 years - judging from the size of the young timber, and the remains of a few Oak trees found.

Large Granite Rocks, and Sand Stones, are frequently met with in this Township.

A. W. Morris
Deputy Surveyor.
